DX/SWL/MEDIA PROGRAMS updated Oct 5:
http://www.worldofradio.com/dxpgms.html

** ARGENTINA. 28195 CW, Oct 4 at 2204, dash and VVV LU3DBJ and then a Q-code and long msg not copied. Not in the WGB list on this or any frequency, nor any similar call. In QRZ.com but no info about beacon or anything beyond: ``LU3DBJ Argentina flag Argentina, JORGE LUIS BOMBINO, bernal 1876, Argentina`` (Glenn Hauser, OK, WOR)

** ARGENTINA. Re my last log on 28195: ``Hi Glenn! I logged LU3DBJ on Sep 24 at 2145 on 28195 ten years after it was last reported on 28167 in
https://rxx.classaxe.com/en/rna/signals
This QSY is also indicated in the DL8WX beacon list at
http://www.dl8wx.de/bake_kw.htm
William Buchanan hasn't logged it yet.
Steve Howe, Saint Albans, VT`` (Glenn Hauser, WOR)

** ARGENTINA [and non]. 28485 USB, Oct 9 at 2214, LU8EGG in Buenos Aires, working VA2ONE, Andrew in Montreal, both heard. QRZ.com: ``LU8EGG Argentina flag Argentina, Gabriel German Godoy, Moreno 1744, Argentina`` with photos of equipment, antennas, certificates (Glenn Hauser, OK, WOR)

** BONAIRE. 800, Oct 4 at 0300, gospel huxter in Spanish atop KQCV OKC, Christians vs Christians! and no sign of the distorted XEERG. Presumably PJB, but where is it in WRTH 2024? Nothing under BONAIRE, or NETHERLANDS ANTILLES in the ``national`` or ``international`` sexions. Finally find a brief cross reference on page 576 at the end of INTL USA listings, for TWR referring us to Slovakia, Singapore or South Africa! Finally found under CARIBBEAN NETHERLANDS on page 541. Sked includes Spanish at 00-03 & 03-05, targets changing from Cuba to Caribbean at 0300; it would be helpful to know what azimuths: is the latter more favorable for us? And off the air 05-08 before Portuguese, clear for XEERG during those two sesquihours. As also in Q&E mwlist - but how does the ITU? abbr. for this `country` become BES? (Glenn Hauser, OK, WOR)

** BONAIRE [and non]. {re gh`s 800 PJB log:} I looked up some ITU abbreviations. The PJB logging brought up a question about, let's call it taxonomy. Looks like there is a list of List of ITU Member States
https://is.gd/ITU_STATES
and a List of all geographical area designations
https://is.gd/ITU_GEO
So Bonaire, a "special municipality" of the Kingdom of the Netherlands, gets two designations: HOL is the ITU code for the Kingdom, and BES is the code for the group of special municipalities in the Caribbean (Sint Eustatius and Saba being the other two). If this sounds like the DXCC "entity" shenanigans that happens every few years in amateur radio, you're getting close. And in fact, in 2010, these very islands changed their status and that was reflected in the amateur radio realm. - Peter Laws, ON, DXWW ed. (IRCA DX Monitor Oct 12, published Oct 7) {BUT, WHY ``BES``? letters having nothing to do with the islands, except maybe B for Bonaire --- gh} ``BES = B/onaire, Sint E/ustatius and S/aba -- Richard Langley`` Oh! (Glenn Hauser, OK, WOR)

** CANADA. 346 MCW kHz, Oct 6 at 0633 UT, dash and YXL, 500 watts from Sioux Lookout ON, remains the only Canadian NDB I`m hearing now. Many former regulars have evidently been decommissioned. More about Sioux Lookout, which is quite a transportation hub by rail, road and air; name alludes to Ojibwe looking out for Sioux enemies:
https://en.wikipedia.org/wiki/Sioux_Lookout

See also UnIDs (Glenn Hauser, OK, WOR)

** CANADA [non]. In addition to eQSL from Pop Shop Radio, via Woofferton 11990, Sept 10 at 0300, different pQSL also received, now #148, 149, 150, 151 at http://www.worldofradio.com/QSL.html or individually:
https://www.w4uvh.net/PopShopRadio_envelope.jpg
https://www.w4uvh.net/QSL_PopShopRadio_front.jpg
https://www.w4uvh.net/QSL_PopShopRadio_data.jpg
https://www.w4uvh.net/PopShopRadio_enclosures.jpg
(Glenn Hauser, OK, WOR)

** CHINA. 13680, Oct 4 at 1440, extremely rough wobbling carrier, suspected of VOK North; but only listed is CNR1 jamming and SOH (Glenn Hauser, OK, WOR)

** CUBA. 889 & 891, Oct 4 at 0302 just as I hit 890 USB on a bandscan, no hets/spurs/carriers, but they *cut on immediately as I guess R. Progreso was also off and on (GLenn Hauser, OK, WOR)

** CUBA. 6000, Oct 4 at 0310, RHC English S9+30/40 but extremely distorted, unusable. Something`s always wrong at RHC. One wonders how management or engineering at anystation could allow this to go on and on and on, rather than just giving up and turning it off. Makes them a laughingstock (Glenn Hauser, OK, WOR)

** CUBA. 5025, Oct 4 at 0645, S9+35/45 of dead air in Spanish from R. Rebelde where something`s always wrong (Glenn Hauser, OK, WOR)

** CUBA. 5025, Oct 5 at 0640, S9+20/40 of dead air in Spanish yet again from R. Rebelde, where something`s always wrong (Glenn Hauser, OK, WOR)

** CUBA. 6000, Oct 6 at 0330, RHC S9+30 but suptorted probably English. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 9790, Oct 6 at 0337, S9+20/30 of JBM Chinese, then English with cgtn.com reference. CRI relay by RadioCuba where something`s always wrong (Glenn Hauser, OK, WOR)

** CUBA. 9790, Oct 7 at 0327, S9+20 of undermodulated but sufficient English from CRI relay; something`s always wrong at RadioCuba (Glenn Hauser, OK, WOR)

** GERMANY. 9670, Oct 6 at 0307, drama from Texas Radio SW, oldtime radio of Texas Rangers, instead of music, S9+10/20 direct, seems too strong for alleged power of Channel 292 (Glenn Hauser, OK, WOR)

** INTERNATIONAL WATERS [non]. 14325 USB, Oct 9 at 2202, Hurricane Watch Net with advisories, web references; don`t venture out if you`re in the Eye, as will swiftly resume blowing from opposite direxion. Other HWN net is on 7268 LSB (Glenn Hauser, OK, WOR)

** JAPAN. 28388 USB, Oct 7 at 2204, one of few 10m hamsigs sounds like JH0TEV calling CQDX. It`s fonetik but heavy accent makes for tough copy, especially second letter: sounds like ``hoteru``. BUT that call not in QRZ.com. Soon worx AJ0L, unheard here, complains of bad propagation (Glenn Hauser, OK, WOR)

** JAPAN. 13860, Oct 8 at 0702, S5/S7 music, the OSOB: NHK Japanese for S America direct at 0655-0900 (Glenn Hauser, OK, WOR)

** MEXICO [and non]. Finally someone else reports this, Terry L Krueger: ``Boggy, Florida Occidental, IC-R75, NRD-535, ICF-7600GR, Tescun PL-360, active loop, random fence-stapled wire, misc. junk.

800 MEXICO XEERG RG la Deportiva, Ojo de Agua, Nuevo León 0933 9/26/24. As per Glenn Hauser's identification of the source of this mess, very strong with highly distorted and FMing audio with seemingly Spanish pop/rock vocals. Occasional KQCV fading up under`` (Glenn Hauser, WOR)

** MEXICO. 6185-, Oct 9 at 0615, XEPPM, S9+15/25 of dead air or maybe trace of modulation, which happens too often late at night; and as usual frequency slightly offset minus. Normally they play a nice wide variety of music (Glenn Hauser, OK, WOR)

** MEXICO. Sporadic E was pushing 88 MHz earlier Oct 8 but no FM DX. By 2207 I`m checking 10m CW beacons and find two of the reliable XEs: 28183.2, dash and VVV XE1RCS/B, and at 2209 on 28276, XE1JAL/B with a VG signal, each logged several times before. In the WGB list, XE1JAL/B is in Xalapa, Veracruz but XE1RCS not listed on any frequency. So this was my last log in 2023y:

``28183+, May 15 at 2314, VVV XE1RCS/B and E+ something grid square: XE1RCS Mexico flag Mexico, Radio Club Satélite A.C., Apartado Postal 341-A, Ciudad Satélite, Naucalpan, Edo Mex 53100, Mexico. WI5V list: ``28.183 XE1RCS C CERRO GORDO, MEXICO # 5W, VERTICAL New 8/08/08, Club call 27/06/10 Back on 16 Sept 1`` (Glenn Hauser, OK, WOR)

** NEW ZEALAND. 17675, Oct 3 at 0624, RNZP S6/S9 direct, back here as scheduled during this final hour, instead of 13690 last night (Glenn Hauser, OK, WORLD OF RADIO 2263)

** NEW ZEALAND [and non]. 17675, Oct 8 at 0653, RNZP at S6/S9, almost the OSOB: no 17600 Algeria, but JBA carrier on 17715. Nothing listed then but maybe VATICAN prior to *0700 Arabic. NO signals on 15 MHz band. Look at WWV prop as of 0600, notably K-index of 7.33!

``:Product: Geophysical Alert Message wwv.txt
:Issued: 2024 Oct 08 0600 UTC
Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
Geophysical Alert Message
Solar-terrestrial indices for 07 October follow.
Solar flux 277 and estimated planetary A-index 55.
The estimated planetary K-index at 0600 UTC on 08 October was 7.33.
Space weather for the past 24 hours has been strong.
Geomagnetic storms reaching the G3 level occurred.
Radio blackouts reaching the R3 level occurred.
Space weather for the next 24 hours is predicted to be strong.
Geomagnetic storms reaching the G3 level are expected.
Radio blackouts reaching the R2 level are expected.``
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6925 AM, Oct 4 at 0314, S9+10/20 of pirate music. These say it`s Liquid Radio:
https://www.hfunderground.com/board/index.php/topic,134576.0.html
Some editors insist on deleting such references! (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6925 AM, Oct 6 at 0306, pirate music S9+20. Several logs as Liquid Radio:
https://www.hfunderground.com/board/index.php/topic,134704.0.html
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6924.96 AM, Oct 7 at 0316, rock music, S9+20, 0317 ``Liquid Radio`` ID, and more reports here:
https://www.hfunderground.com/board/index.php/topic,134788.0.html
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6935 USB, Oct 6 at 0305, pirate music like a M&W lovesong, S9+10. Several logs as B-Side Radio, but mostly in AM: https://www.hfunderground.com/board/index.php/topic,134699.0.html (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6955+, Oct 6 at 0304, pirate-bandscan encounters musical tones when tuned here on USB, like CW bursts at slightly different frequencies. Wish I had a recording of the tune. Stops shortly and nothing further around frequency in any mode. WTF Radio Worldwide had many reports earlier on 6955 USB, including one at 0247, ``Morse code sounding beeps and boops``: https://www.hfunderground.com/board/index.php/topic,134690.0.html (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6970.08 AM, Oct 6 at 0331, S9/+10 of undermodulated pirate music. More reports as unID: https://www.hfunderground.com/board/index.php/topic,134703.0.html (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 7475, Oct 4 at 0316, Station YHWH at S9, but Josiah undermodulated so JBA (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 7475 AM, Oct 6 at 0334, JBA carrier direct vs utehash on the plus side; with LSB tuning can recognize the intonations of Station YHWH. He may need to QSY (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 11529.900, Oct 4 at 1652, song JBA, could be Japanese, S5/S7 into Utah SDR. Rick Barton, AZ, had just reported at 1630 that Hikari FM had moved up from ``11515`` to ``11530``, but really about 0.1 kHz low from new frequency just like old one. Around here is likely to conflict with KurdoTurco radio war, not heard now, tho at first there was some chirping like has been around 11935 SaudiYemen, and then again at 1659 (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 11529.9, Oct 6 at 0338, JBA carrier from presumed Hikari FM pirate on new frequency with signature offset (Glenn Hauser, OK, WOR)

** OKLAHOMA. 1210 kHz, Oct 6 at 0314 UT, S9+30/20 stupid sportstalk about football. Got to be KGYN Guymon, blasting thisaway at night instead of protecting WPHT Philadelphia as licensed; and still/again at 0624, S9+30/40 of sportstalk. Not unusual, but not always. KGYN is U2 22/10 kW, so on ND day pattern at least, or even day power. Years ago there were plans to move 1210 to OKC, but never happened (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 89.1, Oct 4 at 1943 past 2050 UT, dead air in $tereo from K206CA, Enid, translator of 90.5 KNYD, Oasis Network gospel huxter. At least that reduces the ACI to 88.9, feeder frequency I have been using for BSR-1 SW caradio; but still squeezed by another local translator on 88.7. Of the four available, 88.3 should be best. When it worx, K206CA cannot really be picking up KNYD direct, since it`s ~200 km away in Broken Arrow/Tulsa, while 90.5 is blocked here by much closer KGVV Goltry with yet another gospel huxter network (Glenn Hauser, Enid, WOR)

** SPAIN. 17715, Fri Oct 4 at 2200, token English from SNR, best here S9/+10 on SAm channel as 17855 for NAm is still OFF. So is 15390 for Af, but 15520 for ME also backwardly audible. Something`s notright at Noblejas. Preview topic to be something about art history on October 20; such a discussion underway at 2210 (Glenn Hauser, OK, WOR)

** SPAIN. 15520, Mon Oct 7 at 2200, token English from SNR, S9+10 direct vs S9+20 peaks of intermittent local noise level. Slightly

better on this backward ME beam than on 17715 to S America; 17855 for NAm still AWOL, along with 15390 for Africa much longer gone. Something`s notright at Noblejas (Glenn Hauser, OK, WOR)

** SPAIN. 17855, Oct 8 at 2204, REE N American frequency finally back on air, last heard on Sept 25 and off by Sept 27, roughly one biweek. But if it`s Tuesday, there must not be English, rather Ladino at this hour. 17855 is S6/S9 direct, about equal to 17715 for S America, while 17855 ought to be much stronger, so something is still wrong. 15390 still gone of course, leaving 15520 backwards for ME the best at S9/+10 (Glenn Hauser, OK, WOR)

** SPAIN. 17855 & 17715, as previewed yesterday, Oct 9 at 2159 both NAm & SAm SNR frequencies on air for token English on Wed. About same level, S9/+10. The // to ME 15520 about same S but sounds better off the back, lower MUF trumping azimuths. By Oct a lower band for us should be more reliable at this hour, but they wait until B-seasons to plunge to 9690 (Glenn Hauser, OK, WOR)

** TURKEY. 11785.006, Oct 3 at 2255, VOT English S9+45 into UTwente at s/off, so confirmed just in time not off the air today as I am finishing WOR 2263 (Glenn Hauser, OK, WOR)

** TURKEY. 11785.006, Oct 4 at *2157 IS on at full power, S9+20/30 direct. 2200 timesig about 2 sex behind WWV, s/on as if it`s 1230 on 17620: something`s always awry at Ankara. 2211 from music to `Review of the Turkish Press`. 2213 ``always-by-your-side`` promo, music. 2223 into UTwente when measured, VG music. 2229 ``a-b-y-s`` again. 2230 `Turkish Folk Tales` about morality doing good vs doing bad to others and oneself. 2235 music. 2253 s/off as if 17620. 2254 IS to before 2255* (Glenn Hauser, OK, WOR)

** TURKEY. 11785+, Oct 5 at 2201 t/in via UTwente, signal with dead air in English, not at usual blasting level but chop 2202* before I can measure S or exact frequency offset; and does not come back. So VOT tries but fails again to get going. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY. 7275, UT Sun Oct 6 at 0300, INTRUDER targeting N America inside our 40m hamband, VOT English not off the air, VG S9+30/40 direct, s/on pretending it`s yesterday at 1230 on 17620. Does not name which features will air later in hour. Olds leads with extremely detailed casualty figures from Gaza, presumably from the Hamas authorities, treated as if true: Israel killed 23 more Gazans the past 24 hours, injured 66. Totals over almost a full year of conflict: 41,825 killed, 96,910 more injured in this ``genocidal war`` which also has destroyed 79% of the mosques.

Not monitored further on 7275, but at 0339 I find dead air slightly above 11785 at S9/+10, suspiciously like the 2200 transmission which was missing Oct 5 - could that be another Emirler transmitter somehow on the air now? Per EiBi only 11785 scheduled now is CNR-2 from Xianyang site at 00-13. I bet it is Emirler, where something is always erroneous (Glenn Hauser, OK, WOR)

** TURKEY. 11785.007-, Sun Oct 6 at 2157, VOT IS & English IDs, S9+50 into UTwente, not off the air. 2200 timesig and s/on as if it`s 1230 on 17620, no preview of program segments; 2201 olds starting with pressure on Israel for cease-fire. By 2217 `Weekly Analysis` about Iran attacking Israel, most of the military targets supposedly hit, but Israel censors such news. By John Hodgin[? sounds like], Senior Foreign Policy Researcher.

2221 `Letterbox`, for ``my lovely dear listeners``. 1) Jayanta Chakraborty, New Delhi, a regular, report of 20/8 wonders who wrote

national anthem, and are there parx for endangered animals? And wants stamps for collexion. Gives name of composer which we should Google. but no way without spelling it - or, way: see my 7275 report; well, there are zoos. Halil host says after 12 years in Turkey, his Malaysian wife`s visa has to be renewed every two years at considerable expense, dual citizenship not allowed. 2) at 2229, Siddartha ---, India, reception report and question about suicide rate in Turkey. Halil doesn`t know but says Japan is ``top suicidal country`` and also high in Singapore where it`s much more stressful than ``relax`` Malaysia. 3) at 2234, r.r. from Dymantis? in ``Letonia`` or is it ``Letunia`` so is it Lithuania or Latvia?? 4) at 2234 another from Sid about suicide but different date. 5) at 2235, Annan --- ---, Pak or India? It`s India on behalf of 324-member club in India, wants stuff. 6) at 2238, Tampere, Finland, Perki[?] ---, 15/9 report of 17620. 7) at 2239, small writing, from Rafael Gustavo Grajada? Rosado in Veracruz, Mexico, report of 9/16; do they speak Portuguese or Spanish there? 8) at 2242 from Mohamed Suamin? in Kerala. 9) at 2244, can`t read the handwriting at all like at a pharmacy, Spain? 10) at 2245, postal airmail from Michael Linden?, Germany, 8/25, asserting SW is more reliable than internet. At 2249, ``goodbye, my lovely3 listeners, bye2`` - so this one has run a good 28 minutes. 2250 music. 2254 s/off of 17620, and fragment few notes of IS before 2255* chop, no finesse. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY. 7275.02, UT Mon Oct 7 at 0321, VOT undermodulated with music, 0324 more music, S9+20/30 direct with flutter as K index = 5.33. BUT: This is not a replay of the Sun 1230 broadcast like heard at 2200 on 11785+, which it normally would be, since by 2221 The Letterboxxe Programme had started! Something`s very erroneous at Emirler. They are broadcasting something other than the last English hour. By 0353 just in time I`ve tuned it via UTwente refining the frequency to 7275.019, greater offset than usual and a different transmitter as it`s also squealy, instead of English s/off at this minute, the *different* IS they play for the Turkish language service, interspersed with Turkish IDs, i.e. about to start at 0400. And at 0355 the choral national anthem is playing, which we never hear on the external service == but it`s chopped off! a few sex later. Meanwhile I switched to 6165 which is supposed to be // 7275 in English, but it`s off already. Turkish from 0400 is supposed to be on 6040 & 9770, unchecked as I only uplooked HFCC later. The anthem:

``İstiklâl Marşı is the national anthem of both the Republic of Turkey and the Turkish Republic of Northern Cyprus. Mehmet Akif Ersoy (20 December 1873 – 27 December 1936) was a Turkish poet, writer, academic, politician, and the author of the Turkish National Anthem `` -- wikipedia. Here it is with translation, barely more than one minute long:
https://www.youtube.com/watch?v=hWOmuL11g8w
(Glenn Hauser, OK, WOR)

** TURKEY. 11785.009-, Oct 7 at 2159, VOT English not off the air, IS, 2200 TS and s/on the 1230 on 17720, S9+10/20 direct, but no time to listen. Checked at 2227 into UTwente when measured, now only S9+5/10 with flutter during music. By 2251, flutter is heavier even unto there, 2251 s/off and only fragment of IS before 2252.5* chop, no finesse. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 11785, Oct 8 at 2158, VOT IS VP S7/S8 direct vs local HNL up to S9+10, and even ROMANIA 11800 is a JBA carrier. Propagation very disturbed. But at 2230 into UTwente, RRI is VG S9+20/25, while there`s algo JBA around 11785 not even synch-locking, so VOT must have crashed or be exciter-only as nothing else scheduled. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 11785.006+, Oct 9 at 2158, VOT not off the air, IS and English IDs, S9/+20 direct but insufficient vs noise level for easy listening. Yet it`s much stronger than Romania 11800, which has a somewhat more northerly path vs the auroral zone. At 2233 into UTwente when measured, S9+5/15 and sufficient. 2239 ending `The Middle East and Turkey`, music. 2243 `Sports Panorama`. 2251 headlines. 2253 s/off. 2254.3 IS to 2255* (Glenn Hauser, OK, WOR)

** U S A. 251 MCW kHz, Oct 4 at 0648 UT, only slightly unusual beacon is JBA, AM, 100 watts from Amarillo TX. Still fighting huge local noise level (Glenn Hauser, OK, WOR)

** U S A. Bedtime beacon bandscan finds a few MCW peripherals JBA vs noise level, Oct 5 at 0644-0650 UT:
305, RO, ROswell NM, but copiable tuned to 303 USB
326, MA, MidlAnd TX
329, PMV, PlattsMouth NE
341, JBA carrier, could be OIN KS, DNI TX or even EI Enid reactivated?
356, ODX, Ord NE (Glenn Hauser, OK, WOR)

** U S A. 15016 USB, Oct 4 at 0630, USAF cipher message, training exercise? Can`t understand tactical ``ID`` - sounds like ``This is Dub-Yer``. Repeated several times fonetikally: UC6QUCE, then entire message starting with those, plus: ATN5CBKKZ6BXFL743YTWXRGBM (Glenn Hauser, OK, WOR)

** U S A. 28203.5. CW, Oct 8 at 2208, VVV K6LLL/B and long pause. Beacon not in WGB list but QRZ.com: ``K6LLL USA flag USA, Thomas N Hobbs, South Orange Amateur Radio Association, PO BOX 2545, Mission Viejo, CA 92690, USA. Please visit our web site in honor of our friend Ted:``
http://www.soara.org/Beacon.htm
(Glenn Hauser, OK, WOR)

** U S A. Lots of 10m beacons, mostly domestic, Oct 9 at 2205-2210, including, along with WGB list === and then QRZ.com info:

29204+, dash, VVV AJ4YN/B - and ends with QSL: ``28204 AJ4YN/B - Chesapeake VA USA FM16uo - #0 (03 Oct 2024) Note: VVV - Pwr 5w (Ex 28285.5)`` === ``AJ4YN USA flag USA, Ray B Kauffman, 3140 Bunch Walnut Rd, Chesapeake, VA 23322, USA, ``My cat saw a frog in the pond and went swimming after it. She is a good swimmer and kept her tail dry!``

28208+, VVV VVV DE AK2F/B: ``28208 WN2A/AK2F - Budd Lake NJ USA FN20ou - #0/1 (10 Sept 2024) Note: Alternating IDs both /B - Tx homebrew antenna vertical A-99 pwr 3w - 320m asl ``` === ``AK2F USA flag USA, HAYWOOD S PEITZER, 10 BERRY LN
RANDOLPH, NJ 07869, USA``

28235+, WS2K/B: ``28234.5 WS2K/B - Perkasie PA USA FN20jj - #0/1 (24 Sept 2024) Note: ID + grid - Ex 28288`` === ``WS2K USA flag USA, JOSEPH M FLASKA, 323 Kennard Road, Perkasie, PA 18944, USA. Note: I have decided to continue operation of my coordinated 10m CW beacon. It is on the air daily from approximately 1500 to 0200 UTC. In the future I hope to improve to continuous operation. Spots are greatly appreciated. WS2K/B 28.234.5 MHz Power: 10w``

28269+, NH DE AA1TT/B: ``28269 AA1TT/B- Claremont NH USA FN33ur - #0 (14 Feb 2024) Note: ID + grid + EEE - Pwr 5w`` === ``AA1TT USA flag USA, BILLY R MICHAUD, 153A CAT HOLE ROAD, CLAREMONT, NH 03743-4321, USA. If you would like beacon information, or would like to give a reception report, (Reports are greatly appreciated, both skywave and groundwave) Please check: http://www.wx1nh.us (Links on the left)``

(Glenn Hauser, OK, WOR)

** U S A. QSL cards: EDWARD R. MURROW TRANSMITTING STATION, Office of Cuba Broadcasting, 3919 VOA Site B Road, Grimesland, NC 27837 USA --- We are pleased to verify your reception report --- DRM --- Day 31, Mo Aug, Yr 2024, UTC 0051, Freq - kHz 6090, Macon M. Dail, Jr., Chief Engineer. TWO cards each filled out individually identically, but neither including name of recipient; printed on one side only. Perhaps so I can file one under CUBA NON, the other under USA? Card design over background of antenna field, also with MARTI and VOA logos.
https://www.w4uvh.net/VOA_DRMtest_6090_GB2_QSL.jpg
or No. 152 via http://www.worldofradio.com/QSL.html
Postmarked 1 Oct 2024 Raleigh NC 275, received 7 Oct. Enclosed photocopy of info sheet about ``Greenville`` station, including: 8 high-power SW transmitters. Five are rated for 500 kW, three for 250 kW, but all eight operated at 250 kW to reduce operating budget. Equipped with approx. 40 broadcast antennas, between 03 and 305 degrees. 305? Per azimuthal map, that would aim at S Pacific, northern Australia. I had emailed a report as requested on the DRM text; axually decoded by NH kiwiSDR, not aimed thataway. This was not one of those transmitters, only 6.5 kW as in my original report and reply from him here:
https://www.w4uvh.net/ghlogs_2024_0829_0904.txt
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2262 monitoring: ``From: Richard Lemke, St. Albert, Alberta, Canada, the desk of Richard’s listening Post, Radio: JRC NRD-535 HF, Antenna: random long wires in the trees. Dear Glenn: WRMI, World of Radio #2262, absense of time elapsed, higher solar activity, less choice, the signal is finally getting back into the Fall routine, 9395 kHz 2330, only, start, ID 2344 as 2262, 2330, 2344, 2358 (45443), S9 signal, October 1 UTC 2024
(Lemke, Richard -AB)``

Confirmed UT Thursday October 3 at 0139 the 0130 on WRMI 5010, S9/+12 into Bonaire SDR.

Also confirmed Thursday October 3 at 1630 on SW Gold Radio, Germany, 6160.001+, S9/+15 into UTwente but heavy splash from 6165 China unless LSB tuning.

WORLD OF RADIO 2263 contents: Algeria, Argentina non, Armenia and non, Austria and non, Bermuda, Brasil, (China), Finland, (France), Germany, (Guam), Iceland, India, Indonesia and non, Korea North & South, Kyrgyzstan, (México), Mongolia, Myanmar, Netherlands and non, New Zealand, Nicaragua?, North America, Philippines, (Poland), Pridnestrovye/Transnistria/Moldova, Russia, Sa`udi Arabia, Spain, Thailand, Turkey, UAE, USA, AM car radios, Vanuatu, (Yemen non); propagation outlook - (countries mentioned along with others not in order)

1630 UT Thursday SW Radio, Germany 6160.

(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2263 monitoring: UT Sat Oct 5 at 0300*, WTWW 5085 cuts off air immediately after ID as if intentional. I emailed George immediately, what`s going on? And it came back on at *0305 with WOR S9/+10 in progress thru 0329, then a bit of music and off again.

Also confirmed Saturday October 5 at 1445 the 1430 on SW Gold Radio, Germany, 6160.000, S9/+10 into UTwente.

Also confirmed Saturday October 5 at 1600 on WRN North America webcast.

Also confirmed Saturday October 5 at 1734 the 1730 on SW Gold Radio, Germany, 6160.000+ at S9+15/20 into UTwente but with RTTY QRM from 6164 and broadcast splash from 6165; and 3 words behind on 3975.002-, S9/+15 in the clear.

Also confirmed Saturday October 5 at 1958 about 6 minutes into so started circa 1952 on WA0RCR, 1860 AM, S9+17 by groundwave into nearby SDR.

Also confirmed Saturday October 5 at 2000 on WRN European stream. Next:

2300 UT Saturday WTWW 9475 [not on air at 2235, but might come up?];
0000 UT Sunday WRMI 9955 to SSE [also web-, phonecast; jammed?];
0230vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0500];
1900 UT Sunday IRRS 1323-Italy;
2130 UT Sunday SW Radio, Germany 3975 & 6160;
2330 UT Sunday WRMI 7570 to NW;
0030 UT Monday WRMI 7780 to SW;
0300vUT Monday WBCQ Area 51 6160v to WSW [irregular];
0830 UT Monday SW Radio, Germany 6160 [resumed];
1930 UT Monday SW Radio, Germany 3975 & 6160;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2263 monitoring: confirmed Saturday October 5 at 2300 on WTWW 9475, VG direct. Had been off but cut on with SFAW at *2240 in plenty of time for WOR. At 2340, I wrote to George: ``Tnx for getting 9475 up and running in time for WOR. Hope your repairs are going OK - Glenn`` - and he replied at 2345: ``Glenn, Just finished removing from the high voltage line, a bad power module that was causing overloads. Running fine NOW. George McClintock 10-5-2024``.

Also confirmed UT Sunday October 6 at 0025 the 0000 on WRMI 9955, S9+10/25 into Pardinho, Brasil SDR.

Also confirmed UT Sunday October 6 from 0411 the 0315v on WA0RCR, 1860 AM, S9+15/20 into nearby remote but also well audible direct; followed ARRL News for 15 minutes from 0356.

Also confirmed Sunday October 6 at 1900 on IRRS via AM Italia, 1322.995- kHz, S9+7 into UTwente across Europe. Next:

2130 UT Sunday SW Radio, Germany 3975 & 6160;
2330 UT Sunday WRMI 7570 to NW;
0030 UT Monday WRMI 7780 to SW;
0300vUT Monday WBCQ Area 51 6160v to WSW [irregular];
0830 UT Monday SW Radio, Germany 6160 [resumed];
1930 UT Monday SW Radio, Germany 3975 & 6160;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2263 monitoring: confirmed Sunday October 6 at 2155 the 2130 on SW Gold Radio, Germany, 3975.002+ at S8/9+10 into UTwente.

NOT confirmed Sun Oct 6 at 2330 on WRMI 7570, because it`s OFF the air, nor on later in evening. WRMI-11 sked 2300-0400, first hour RAE, rest TOMBS per xmtr grid. But WOR still shows on the System D sked.

Confirmed UT Monday October 7 at 0030 on WRMI 7780, S9/+10 into Georgia and Missouri SDRs.

Also confirmed UT Monday October 7 at 0300 on Area 51 via WBCQ 6160-, S9+20 with auroral flutter direct.

Missed checking Mon Oct 7 at 1930 on SW Gold Radio, Germany, 3975 & 6160; anyone hear it? Next:

0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2263 monitoring: confirmed UT Tuesday October 8 at 0342 the 0330 on WRMI 7780, VG S7+15/22 into RGV = McAllen TX SDR.

Also confirmed Tuesday October 8 at 1312 the 1300 on WRMI 9955, VP S6/S9 direct. At least no jamming heard, with outages and breakdowns in Cuba. See:
https://www.reuters.com/world/americas/nearly-half-cuba-without-power-blackouts-deepen-2024-10-04/

Also confirmed Tuesday October 8 at 2000 on IRRS SW via AM Italia, 1322.995+, S9 into UTwente. Next:

2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 6160.

(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2263 monitoring: confirmed Tuesday October 8 at 2330 on WRMI 9395, S9+40/45 into Georgia SDR.

Also confirmed Tuesday October 8 at 2330 on SW Gold Radio, Germany, 3975.002+, S7/S9 into UTwente.

Also confirmed Wednesday October 9 at 1930 on SW Gold Radio, Germany, only JBA S5 on 6160.000–, prop. disturbed, with RTTY from 6164; and S9+5/10 on 3975.002+ into UTwente.

Also confirmed Wednesday October 9 at 2100 on WBCQ 7490 –63 Hz = 7489.937, S9/+12 into NH SDR. Next:

0130 UT Thursday WRMI 5010 to S; {ALL WRMIs OFF due to H. Milton}
1630 UT Thursday SW Radio, Germany 6160.

Thanks this week to Jim C. Shideler, W5JCS, Stillwater OK, with a contribution via PayPal to woradio at yahoo.com

One may also contribute by MO or check on a US bank to:
Glenn Hauser, P O Box 1684, Enid OK 73702
(Glenn Hauser, OK, WOR)

** U S A. 9475, Oct 4 at 0042, WTWW on the air but SFAW modulation breaking up. Earlier Oct 3 it was off the air while 9930 was on as it is now with TOMBS. Still has problems (Glenn Hauser, OK, WOR)

** U S A. 9475 off but 9930 on, Oct 5 at 0013 from WTWW; one transmitter still down, the one which would have carried WOR. But 5085 is on after 0100, still 0208 (Glenn Hauser, OK, WOR)

** U S A. WTWW: George McClintock informs me at 2315 UT Oct 7: The Overcomer website has been hacked, and can`t get any program feed. They will have to get outside help to restore it. Tried filling with other programming, then turned 9930 off until it can resume. However at my 2335 check looks normal and is playing:
https://overcomerministry.org/listen_live/
At 0151, TOMBS night channel 5920 is off, but the other one is on, 5085.

Says Bro. Scare had confessed his sins personally to George, so respected him but can`t understand why so many love(d) him. Other transmitter 9475 is OK – tho not on the air at 2330 check –– frequency changing wasn`t working until some lubrication applied loosening plungers into the coils.

Also says according to Bob, WRMI had considerable damage from Helene, some antennas and feedlines down such as for 5050, and expensive to repair. I read somewhere else that WRMI is not insured because of that expense. And here comes another hurricane tho apparently not for a direct hit (Glenn Hauser, OK, WOR)

** U S A. WOR iogroup source for my remark about WRMI insurance: ``Not good news for WRMI. After a storm a couple of years ago the station revealed that it doesn’t carry insurance on the facility (“too expensive”) and set up a GoFundMe for donations to enable repairs. Do they have insurance now? Stephen Luce, Houston, Texas`` (Glenn Hauser, OK, WOR)

** U S A. 9930, Oct 9 at 2204, this WTWW is on with TOMBS, but 9475 is off. By 2407 recheck, both are on and VG direct, 9475 with SFAW. Expect both to QSY around 0100 to 5920 and 5085 resp. (Glenn Hauser, OK, WOR)

** U S A. 5010, UT Sun Oct 6 at 0329, this WRMI is off already, instead of running late into the night with TOMBS. Still off circa 0635 (Glenn Hauser, OK, WOR)

** U S A. 17790, 15770, 9455, 9395, Oct 9 at 1900, NO signals direct from WRMI frequencies normally active now, as Hurricane Milton is closing in. It seems that one must consult disgraced FB for latest station info rather than own website! Several of our monitors had just checked that; Mike Cooper copied this at 1843: ``WRMI Facebook posts during the past two hours:

`Hurricane Milton Update as of 1645 UTC Wednesday October 9: We are starting to get some wind gusts here at the transmitter site in Okeechobee, and there are two tornadoes fairly close to us that we are watching carefully. So far our transmitters are operating normally, but we anticipate we will have to shut them down in the coming hours as winds get stronger here. We will try to maintain our livestream at www.wrmi.net. Thanks to everyone who has emailed us, texted, called, etc. with your good wishes.

Hurricane Milton Update as of 1825 UTC Wednesday October 9: There are tornado warnings in effect for the area of our transmitter site in Okeechobee, and at least one confirmed tornado sighting. And winds are getting quite high. So we are shutting down all transmitters now until further notice. Our Internet stream should remain on the air. So far we still have electrical power.

1835 UTC Wednesday Oct 9: Our frequency of 7730 kHz remains on air, as well as our www.wrmi.net stream. Power went out briefly, but has returned.```

I check FB at 2317 and find only one more entry: ``1838 UTC Wednesday: Power has gone out again at the transmitter site. Only our Internet stream remains``
https://www.facebook.com/wrmiradio
Good luck to Jeff and company to survive and recover from this (Glenn Hauser, OK, WOR)

** U S A. Pre-`AAAWWW` chex of WBCQs into NH SDR, Oct 4 at 2345 and same at 2355: 3265 & 5130 OFF. 6160 -70 Hz = 6159.93 at S9+10/12 with TOMBS, and RTTY QRM from 6164 like I also hear in Europe vs SW Radio, Germany; more noise about 6165-6176, DRM? 7490 -68 Hz = 7489.932 with FKB, S9+10/20. By 0000 UT Sat Oct 5, 7490- only disclaims that following originally aired on July 12, 2024. AW starts with ``Hit it!`` - never mind now but q.v. (Glenn Hauser, OK, WOR)

** U S A 3215, Oct 3 at 0630, S9+30/35 of dead air in English from WWCR; the other two, 4840 and 5935, are not dead. Program sked dated Oct 1 shows WWCR-1 3215 is OFF AIR seven nights a week at 0500-1100. 5890 WWCR-4 is also OFF AIR now Thu, as sked M-F, unlike last night Wed when it was really on with TOMBS. Something`s not right at Nashville (Glenn Hauser, OK, WOR)

** U S A. 4840, UT Sunday October 6, 2024 at 0320 I run across WWCR with some guy citing outdated DX loggings --- like Spain on 12030 and 11675, WBCQ via Woofferton in Arabic on 9800 - huhh? 9970 RFA via Marianas. 9675 Saudi in Turkish. 11530 V of Welt [sic] in Kurdish, and there will be no HFCC meeting in Bulgaria in August! No ID outro, 0326 switch to Bible stuff. It`s obviously Bob Padula! Yes, `Australian DX` is still on the WWCR 4840 sked dated Oct 1, at 0315 UT Sundays.

Trouble is, it`s over 4 years old!!! HFCC: ``Due to the ongoing COVID-19 situation, the conference in Bulgaria in August 2020 has been cancelled. The B20 coordination is to be done online via our website,

e-mail correspondence, etc.``

What a WWCR disservice. I think BP stopped producing those years ago, but I never listened since there was never any accurate, useful info; his logs were ``routine`` at the time, nothing newsworthy about them. And once cordial BP blew me off long before, when I dared to point out to him some errors. I think he forbade me to quote him, which was fine with me. He`s also on the outs with ARDXC. Evidently he has changed passtimes to hiking instead of DXing. Has WWCR been running the same 4+year-old show every week, or more variety of useless outdated misleading info? (Glenn Hauser, OK, WOR)

** U S A. 9275, Oct 8 at 2200, bit of music before 2201* - I just caught WMLK closing down as sked. Other frequency late at night, 15150, is sometimes VG, sometimes JBA depending on propagation if not operation (Glenn Hauser, OK, WOR)

** URUGUAY. 28493 USB, Oct 8 at 2212, CX8W in Montevideo working WT1A in English, the latter JBA here. Says 100 watts to a vertical. Not in QRZ.com; I was uncertain about the number in his unclear rapid callsigning; another number? (Glenn Hauser, OK, WOR)

** URUGUAY. 28513 USB, Oct 9 at 2212, QRZ from CX7RM, Montevideo. QRZ.com: ``CX7RM Uruguay flag Uruguay, Pablo Goldaracena Sommaruga, Pinares Calle Sagitario 20005, Punta del Este, Uruguay`` with lots of photos of antennas, equipment, friends and family, dog, certificates (Glenn Hauser, OK, WOR)

** YEMEN [non]. SAUDI ARABIA. 11934.894, Oct 3 at 1839, music, no chirping, S9+12/20 into UTwente; 1919 recheck in pause, then Arabic ID for Republic of Yemen Radio, from Sana`a, into Qur`an. Interrupted for more IDs at 1928, 1935, 1944 and back to regular programming (Glenn Hauser, OK, WORLD OF RADIO 2263)

UNIDENTIFIED. 338 kHz, among several intriguing JBA MCW carriers on NDB band, Oct 6 at 0630 UT, partial call as #M but nofits in RNA list or dxinfocentre. 338 is normally RYN Tucson or TU Tulsa.

359 MCW, Oct 6 at 0634 UT, seems like MGF: probably GGF, Grant NE (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 630.05 kHz approx., Oct 8 at 0703 UT, het upon 630 signals. Nothing this far off at mwoffsets (Glenn Hauser, OK, WOR)

UNIDENTIFIED. Trans-Atlantic JBA MW carrier search: full 9/kHz bandscan at 0308-0312 Oct 6 hits only two: 774, likely Spain, and 1089, likely UK; and no 889/891 now but yes at 0621 presumed Cuba (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1152.1, Oct 7 at 0302, JBA carrier; in addition to 1141.0 presumed Cuba (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 6920 LSB, Oct 4 at 0313, 2-way or multi-way net in Spanish with indecipherable talkovers. Either the stations can`t hear each other or not paying attention to cambios, taking turns, duh. This area down to 6900 are replete with such intruders into the Pirate Band, hi, probably Mexicans (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9697-9716 approx., Oct 6 at 0336, OTH radar clickery; fortunately no broadcasters in this area, maybe no coincidence (Glenn Hauser, OK, WOR)
